## INVESTMENT PHILOSOPHY

### TARGET INVESTMENTS THAT CAN GENERATE STRONG RETURNS WITH AN ADEQUATE MARGIN OF SAFETY

- Individual securities can and do significantly deviate away from their fair value.
- Potential to generate strong risk-adjusted returns by investing in select securities at opportune times.
- Event-driven special situations can provide strong risk-reward opportunities (e.g. M&A, asset sales, strategic reviews, corporate actions such as spinoffs/demergers, changes in leadership, changes in strategy, and capital management announcements such as buybacks/return of capital/increased dividends/special dividends).

### AIM TO HOLD A HIGH CONVICTION, CONCENTRATED PORTFOLIO

- Only invest in a compelling opportunity, otherwise hold cash.
- Prefer to invest heavily in a small number of high conviction opportunities than invest small amounts in a large number of less compelling opportunities.

### INVEST BASED ON FUNDAMENTAL ANALYSIS

- Bottom up stock selection, focusing on the fundamentals of individual companies whilst keeping abreast of macroeconomic indicators and conditions that may directly impact those fundamentals.
- Conduct extensive proprietary research with a focus on:
  - **Board and management** – track record, skin in the game.
  - **Credit risk** – gearing, debt profile, interest coverage.
  - **Earnings** – free cash flows including timing and likelihood, margins, payout ratio, and growth potential.
  - **Valuation** – multiples, discounted cash flow analysis, break-up value.
  - **Competition** – market share, industry position, market dynamics.

## CHAIRMAN'S LETTER

Dear Shareholder,

NGE Capital Limited (**NGE** or **Company**) recorded a net profit after tax of \$8.9 million for the financial year ended 31 December 2023. The portfolio returned 25.0% pre-tax and after all expenses during the year. NGE has returned, net of all expenses, 12.3% p.a. or 127.5% in aggregate since 30 November 2016, when the Company began operating as a Listed Investment Company (LIC).

The key positive contributors to portfolio performance in FY2023 were unrealised gains from our uranium basket (expressed via holdings in **Yellow Cake plc (LSE:YCA)** and **Sprott Physical Uranium Trust (TSX:U.UN)**) and holdings in **Industrial Logistics Properties Trust (NAS:ILPT)**, **Danakali Limited (ASX:DNK)**, **John Wood Group plc (LSE:WG)** and **Embark Early Education Limited (ASX:EVO)**. Additionally, we realised solid gains from fully exiting holdings in **Golden Energy and Resources Ltd (SGX:AUE)** and **Franklin Street Properties Corp. (AME:FSP)**, partially selling down **John Wood Group plc (LSE:WG)**, and receiving shareholder distributions from **Danakali Limited (ASX:DNK)**. The key detractors were mark-to-market declines in **Metals X Limited (ASX:MLX)** and **Jupiter Mines Limited (ASX:JMS)**, and realised losses from exits in **Geo Energy Resources Limited (SGX:RE4)** and **Argo Group International Holdings, Ltd. (NYS:ARGO)**. We provide a brief portfolio update on our top holdings below.

We continue to remain cautious on the macroeconomic outlook. Up until recently global equity markets appear to have largely shrugged off recession concerns, as the consensus narrative shifted to a belief that inflation has been defeated, employment and consumer spending remain strong, a “soft landing” has been achieved, central banks will cut interest rates, and asset prices should do well. The contraction of the UK and Japanese economies in the past two quarters and China’s ailing property sector suggest that decelerating global growth may be behind the softening inflation figures, potentially setting up bullish investors for disappointment. Further adding to our caution is our expectation that it may take longer than anticipated for inflation to get sustainably below 2% long-term targets, as growth in wages, energy prices and rents may prove to be sticky even in a slowing economic environment.

Government stimulus such as the Biden administration’s “Inflation Reduction Act”, and ongoing geopolitical tensions including in the Middle East where shipping routes through the Red Sea continue to be impacted, are likely to be inflationary. Complicating the outlook is the recent sharp decline in US gas prices following President Biden’s decision to pause pending LNG export approvals. Given natural gas is the bedrock of the US economy, the price plunge should provide a near-term boost to the US economy in an election year. However, as US gas producers inevitably curtail supply the risk of a future energy shortage, a violent rebound in gas prices and a potential economic crisis rises. Such a scenario would bring the record level of US federal debt and high fiscal deficit into sharper focus.

In the current “macro heavy” environment, we expect global markets to remain volatile. In response, we will continue to focus on what we can control:

- target investments that can generate strong returns with an adequate margin of safety;
- aim to hold a high conviction, concentrated portfolio; and
- invest based on fundamental analysis.

A broad investment mandate allows us to be flexible and respond quickly to a wide range of investment opportunities and allocate capital to the most attractive ones, across any sector or region. We are also able to be highly concentrated, where holdings can grow very large as a percentage of the portfolio. The flexibility and concentrated nature of our approach was on display on 3 April 2023 when we were able to purchase 11.0m shares of Danakali in a single trading session, taking advantage of heavy selling as the shares sold off just prior to being suspended from trading. We increased our holding from a ~11% to a ~22% portfolio position. Our decisive actions were subsequently rewarded

## CHAIRMAN'S LETTER

with shareholder distributions that exceeded our average entry price for the entire position.

Our cash balance increased to ~28% of NTA at year end (including the \$8.4 million of Danakali distributions receivable that was paid on 8 January). We will be patient about making new investments and look to selectively deploy cash at opportune times when the risk-reward is attractive. In volatile markets event-driven special situations can provide strong risk-reward opportunities that are not correlated to the market. These “special sits”, which we are constantly assessing, can include M&A, asset sales, strategic reviews, corporate actions such as spinoffs/demergers, changes in leadership, changes in strategy, index additions/deletions, and capital management announcements such as buybacks/return of capital/increased dividends/special dividends.

...

### Uranium holding

Our uranium basket – held via holdings in **Yellow Cake plc (LSE:YCA)** and **Sprott Physical Uranium Trust (TSX:U.UN) (SPUT)** – is our largest position at ~26% of the portfolio at year end. We added slightly to our YCA holding in March when the discount to NAV blew out to ~15%. The aggregated position grew significantly following an ~80% increase in the U<sub>3</sub>O<sub>8</sub> spot price to US\$91/lb over the year, leading the security prices of YCA and SPUT to follow.

We initiated our position in 2018 when the uranium price was ~US\$25/lb, and our patience is finally being rewarded. Despite the huge run-up in spot price last year, we believe there are several catalysts in play that should result in higher prices in the near-term. The uranium price peaked at over US\$140/lb in 2007 during the last bull market, which adjusted for inflation would equate to over US\$200/lb in today's money. The price had risen from ~US\$10/lb in 2003 due to a range of factors, which are the same factors driving today's bull market: dwindling supplies of inventory, low primary mined production relative to demand, and increasing net demand for nuclear energy. Arguably the forces in operation today are more durable than back then. The peak price surge occurred shortly after the October 2006 flooding of Cameco's Cigar Lake mine, a black swan event that sent the price into bubble territory.

Excess inventories no longer appear to be overhanging the market. Utilities have been particularly active recently in purchasing material in the spot market, which is unusual given the strong run-up in price. The underfeeding to overfeeding dynamic is playing out, which we flagged as a possibility in last year's letter. Several enrichers have been active in the spot market as buyers, as high conversion and enrichment prices no longer incentivise underfeeding.

Supply coming from Kazakhstan, Russia and Niger looks shaky, at a time when Western utilities have run down their inventories and are short material. There is no guarantee the large incumbent producers – **JSC NAC Kazatomprom (LSE:KAP)**, **Cameco Corporation (TSX:CCO; NYS:CCJ)** and Orano SA – will be able to hit production targets. Indeed, in February Kazatomprom revised its 2024 production guidance down by ~5.2-6.5mmlbs following an expectation it will not have access to sufficient quantities of sulfuric acid to carry out its mining activities. There are no big, new, greenfield mines under construction, and there is a long lead time to bring new production online.

Our original investment thesis centred on growth in net demand coming from new nuclear builds in China, India and the Middle East. Our base case had U<sub>3</sub>O<sub>8</sub> demand growing from ~175mmlbs to ~190mmlbs by 2030. The World Nuclear Association's *Nuclear Fuel Report: Global Scenarios 2023-2040* released in September 2023 has an implied base case demand of ~226mmlbs by 2030, well above our original estimates. We had not anticipated new nuclear build intentions from countries such as France, Japan, the Netherlands, Poland, Sweden, Turkey and the UK when we initiated the position.

Tim Gitzel, Cameco CEO, noted during Cameco's 3Q23 earnings call that “we've never started a cycle

## CHAIRMAN'S LETTER

at this high of a uranium price before". We will be looking to trim our position at some point as it has become very large, but for the moment the fundamentals look better than ever.

•••

### Greek Non-Performing Exposures (NPE) basket

In July 2023 we acquired an aggregate ~10% position across **Galaxy Cosmos Mezz Plc (ATH:GCMEZZ)**, **Phoenix Vega Mezz Plc (ATH:PVMEZZ)**, and **SunriseMezz Plc (ATH:SUNMEZZ)**. At the time, these three Cyprus-incorporated, Athens listed securities were trading at P/E multiples (adj for cash) in a range of ~2.0-3.6x, whilst yielding ~19-25% based on forthcoming capital returns. The earnings are underpinned by quarterly interest coupon payments that flow from long-dated bonds they hold, with longer-term multi-bagger upside potential (up to ~3.5-9x) if bond principal is paid down. Whilst the background story and waterfall payment structure of the bonds held by these entities is somewhat complex, the investment essentially hinges on the continued recovery of Greece's economy and real estate sector.

So far, the thesis has played out very well and investor interest in Greece is presently very strong: to wit, the recent IPO for **Athens International Airport (ATH:AIA)** was 12x oversubscribed. Since year end we have trimmed our basket position, following the recent strong performance of each security.

•••

### John Wood Group plc (LSE:WG)

**John Wood Group plc (LSE:WG) (Wood Group)** is steadily progressing on its turnaround plan, with new management focusing on lower risk, modular, cost-reimbursable work. Previously the company had been badly burnt by cost overruns from large, fixed-price, "lump sum turnkey" projects. Restructuring and one-offs have obscured the quality of the underlying business, which has a high level of repeat business and cash conversion across its divisions. 2024 should see one-off cash outflows drop to ~US\$65m (down from ~US\$140m in 2023), and a further decline to ~US\$30m is expected in 2025. That should help Wood Group start to generate sustainable, positive free cash flows.

A positive outcome from the revived sale process of Wood's 51% stake in the EthosEnergy JV, a turbine servicing business that generated ~US\$30m (Wood share) of adjusted EBITDA in 2023, would allow the company to cut its high-cost debt further. Wood paid an average interest rate of ~11% in 1H23.

Wood Group looks cheap trading on a FY24E EV/EBITDA multiple of ~6.3x compared to closest peer **Worley Limited (ASX:WOR)** on ~11.1x. For Wood Group to regain interest from investors it will need to continue to execute, deliver revenue and EBITDA growth in the mid- to high-single digit range, and print several periods of "clean" financials that show the FCF generation ability of the business. As we have previously noted, Wood's large revenue base (FY23 of ~US\$6bn) mean that small improvements in growth and margins can have a big impact on the bottom line.

•••

### Industrial Logistics Properties Trust (NAS:ILPT)

**Industrial Logistics Properties Trust (NAS:ILPT)** is a REIT that owns over 400 warehouse and logistics properties in the US. ILPT is externally managed by **The RMR Group Inc. (NAS:RMR)** pursuant to business management and property management agreements. RMR handles leasing activities, supervises construction, and evaluates acquisition and disposition opportunities on behalf of the REIT. ILPT's top tenants are **FedEx Corporation (NYS:FDX)**, **Amazon.com, Inc. (NAS:AMZN)** and **Home Depot, Inc. (NYS:HD)**.

## CHAIRMAN'S LETTER

ILPT's occupancy was 98.8% at year end, and the company enjoyed rental growth of ~13% in 2023. Whilst ILPT is overly levered, the non-recourse nature of its debt means the odds of bankruptcy are far more remote than the depressed share price suggests. Its modestly geared Hawaii portfolio alone could be worth ~US\$18/sh, if applying the implied "going in" 4.0% cap rate from **Prologis, Inc.'s (NYSE: PLD)** acquisition of a large industrial property portfolio from Blackstone as announced in [June 2023](#).

The property portfolio is carried at initial cost plus capex (if any) less any impairment and accumulated depreciation. The reason for the extreme undervaluation of Hawaii is because the bulk of the portfolio was acquired in two transactions in 2003 and 2005 at prices that are well below current levels. The Hawaii portfolio consists of ground leases, so capex is minimal. These warehouses are in a highly constrained area, with a history of strong rental growth and high occupancy. For these reasons, the Hawaii portfolio is of particular quality and so a 4.0% "going in" cap rate is likely a fair proposition when valuing these assets.

•••

NGE remains a simple, clean and tax efficient investment vehicle, with ~\$33 million of Australian unused and unrealised losses available at year end. In the aggregate these losses equate to a potential future tax benefit of ~\$8m or ~\$0.23 per share (of which only ~\$2.9m or ~\$0.081 per share is recognised in our after tax NTA). The losses – which include both income and capital losses – were generated from the Company's prior activities as an oil and gas explorer in Papua New Guinea when the Company was called "New Guinea Energy Limited". The Company has received tax advice that these losses are available to be offset against future tax liabilities so long as NGE continues to satisfy the continuity of ownership test as set out in Divisions 165 and 166 of the Income Tax Assessment Act 1997 (Cth).

Now in our 8<sup>th</sup> year as a LIC, we hope that we have demonstrated that our investment approach is sensible, durable and able to generate strong risk-adjusted returns over time. We are confident the portfolio will do well over time given the high discounts at which our investments trade relative to our assessment of intrinsic value. We are excited by the prospect of deploying our significant cash balance into new ideas throughout 2024, and as always we will do so in a patient, disciplined and opportunistic manner.

Yours sincerely,

**David Lamm**  
Executive Chairman  
& Chief Investment Officer

**Adam Saunders**

### REMUNERATION REPORT (AUDITED)

The Directors present the Remuneration Report for Non-Executive Directors, Executive Directors and other key management personnel (**KMP**), prepared in accordance with the *Corporations Act 2001* and the *Corporations Regulations 2001*.

The Remuneration Report is set out under the following main headings:

- (a) Remuneration policy and practices;
- (b) Service agreements;
- (c) Details of remuneration;
- (d) Share-based remuneration; and
- (e) Other information.

#### a) Remuneration policy and practices

The Board has assumed the duties and responsibilities of the Remuneration Committee until such time that the Company's size and operation warrant a Board composition with additional independent non-executive directors. Mr Rimer chairs the Board when it addresses remuneration matters. The Board ensures that conflicted members are not involved in remuneration determination and review discussions. Mr Rimer may engage independent external consultants and advisors to provide any necessary information to assist in the discharge of his responsibilities.

When determining and reviewing compensation arrangements for the directors and KMP, the Board operates in accordance with its established Remuneration Committee charter. The Board seeks to design and develop executive remuneration policy in such a way that it:

- i) Attracts and retains talented senior executives and directors and motivates them to enhance the performance and growth of the Company; and
- ii) Ensures that the level and composition of remuneration packages are fair, reasonable and adequate and, in the case of executive directors and senior managers, displays a clear relationship between the performance of the individual and the performance of the Company.

The Company's policy for determining the nature and amount of remuneration of directors and KMP is as follows:

#### i) Company performance

The Board considers historical company performance when determining the nature and amount of remuneration of directors and KMPs. The following table sets out the Company's historical performance over the past 5 years, as measured by NTA per share:

	2023	2022	2021	2020	2019
NTA per share before tax	\$1.160	\$0.928	\$0.979	\$0.783	\$0.850
NTA per share after tax	\$1.242	\$0.992	\$1.043	\$0.835	\$0.905

### REMUNERATION REPORT (AUDITED) (CONTINUED)

#### ii) Non-Executive Directors

The Board's policy is to remunerate non-executive directors at market rates for comparable companies for their time, commitment and responsibilities. The Board determines the remuneration of the Company's non-executive directors and reviews their remuneration annually. The annual remuneration for non-executive directors is \$25,000 (inclusive of superannuation). In January 2024 the Board approved an increase in annual remuneration for non-executive directors to \$30,000 (inclusive of superannuation), effective as at 1 January 2024.

The maximum aggregate annual remuneration for non-executive directors is subject to approval by the shareholders at a general meeting. The shareholders have approved a maximum aggregate annual remuneration of \$500,000 per annum.

#### iii) Key Management Personnel

The remuneration structure for senior executives, including executive directors, is based on a number of factors, including qualifications, particular experience, general past performance of the individual concerned, overall performance of the Company and benchmarked against industry remuneration levels generally. KMP remuneration comprises fixed compensation and, where appropriate, performance-based short-term incentives. Remuneration levels are reviewed annually by the board through a process that considers individual performance and overall performance of the Company.

##### Fixed compensation

Fixed compensation consists of base salary (which is calculated on a total cost basis and includes any fringe benefits tax charges related to employee benefits) and employer contributions to superannuation funds, as required by law.

##### Performance-based short-term incentive

Performance linked compensation comprises a short-term incentive (**STI**) and is designed to reward KMP for meeting or exceeding the Company's financial objectives and to keep the Company competitive in the marketplace.

The STI is an at-risk bonus provided in the form of cash and based on the key performance indicator (**KPI**) of maximising the NTA per share before tax of the Company. This KPI is reviewed annually by the Board.

Under the STI structure, a pool of funds is established for payment to members of the investment team (which currently comprises the Chief Investment Officer and Portfolio Manager) and is calculated by reference to the increase in NTA before tax over the year (**Performance Fee**). The total value of the pool for distribution is equal to a 10.0% share of the growth in NTA before tax (adjusted for capital raisings and share buy-backs), subject to a high water mark. Subject to exceeding the high water mark, the Performance Fee will be paid annually in arrears.

### 4. SUMMARY OF ACCOUNTING POLICIES

#### a) Overall considerations

The financial statements have been prepared using the material accounting policies and measurement bases summarised below.

#### b) Foreign currency translation

##### Functional and presentation currency

The financial statements are presented in Australian dollars (**AUD**), which is the functional currency of the Company.

##### Foreign currency transactions and balances

Foreign currency transactions are translated into the functional currency of Company using the exchange rates prevailing at the dates of the transactions (spot exchange rate). Foreign exchange gains and losses resulting from the settlement of such transactions and from the re-measurement of monetary items at year end exchange rates are recognised in profit or loss.

Non-monetary items are not retranslated at year-end and are measured at historical cost (translated using the exchange rates at the date of the transaction), except for non-monetary items measured at fair value which are translated using the exchange rates at the date when fair value was determined.

#### c) Revenue and income recognition

##### Revenue

Revenue is recognised and measured at the fair value of the consideration received or receivable to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Net gains/(losses) on financial assets held at fair value through profit or loss arising on a change in fair value are calculated as the difference between the fair value at the period end and the fair value at the previous valuation point. Net gains/(losses) do not include interest or dividend income.

##### Dividends

Dividend income is recognised on the ex-dividend date with any corresponding foreign withholding tax recorded as an expense.

##### Interest income

Interest income is recognised on a time proportionate basis taking into account the effective interest rates applicable to the financial assets.

#### d) Operating expenses

Operating expenses are recognised in the Statement of Profit or Loss and Other Comprehensive Income on an accruals basis.

## NOTES TO THE FINANCIAL STATEMENTS

Continued

### 4. SUMMARY OF ACCOUNTING POLICIES (CONTINUED)

#### e) Earnings per share

Basic earnings per share amounts are calculated by dividing net profit for the year attributable to shareholders of the Company by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share amounts are calculated by dividing net profit for the year attributable to shareholders of the Company, as adjusted for the effect of dilutive potential ordinary shares where applicable, by the weighted average number of ordinary shares outstanding during the year plus the weighted average of ordinary shares that would be issued on the conversion of all dilutive potential ordinary shares into ordinary shares.

#### f) Income tax

Tax expense recognised in profit or loss comprises the sum of deferred tax and current tax not recognised in other comprehensive income or directly in equity.

Current income tax assets and/or liabilities comprise those obligations to, or claims from, the Australian Taxation Office relating to the current or prior reporting periods, that are unpaid at the reporting date. Current tax is payable on taxable profit which differs from profit or loss in the financial statements. Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period.

Deferred income taxes are calculated using the liability method on temporary differences between the carrying amounts of assets and liabilities and their tax bases. However deferred tax is not provided on the initial recognition of goodwill, or on the initial recognition of an asset or liability unless the related transaction is a business combination or affects tax or accounting profit. Deferred tax on temporary differences associated with investments in subsidiaries and joint ventures is not provided if reversal of these temporary differences can be controlled by the Company and it is probable that reversal will not occur in the foreseeable future.

Deferred tax assets and liabilities are calculated, without discounting, at tax rates that are expected to apply to their respective period of realisation, provided they are enacted or substantively enacted by the end of the reporting period.

Deferred tax assets are recognised to the extent that it is probable they will be able to be utilised against future taxable income, based on the Company's forecast of future operating results which is adjusted for significant non-taxable income and expenses and specific limits to the use of any unused tax loss or credit. Deferred tax liabilities are always provided for in full.

Deferred tax assets and liabilities are offset only when the Company has a right and intention to set off current tax assets and liabilities from the same tax authority.

Changes in deferred tax assets or liabilities are recognised as a component of tax income or expenses in profit or loss, except where they relate to items that are recognised in other comprehensive income (such as the revaluation of land) or directly in equity, in which case the related deferred tax is also recognised in other comprehensive income or equity respectively.

### 4. SUMMARY OF ACCOUNTING POLICIES (CONTINUED)

#### g) Investments in financial assets

##### Classification

The Company's investments are classified as at fair value through profit or loss. They comprise:

##### *Financial assets designated at fair value through profit or loss*

All financial assets are held at fair value through profit or loss. These include financial assets that are not held for trading purposes and which may be sold. These are investments in exchange traded or unlisted securities.

##### Recognition and derecognition

Purchases and sales of financial assets at fair value through profit or loss are recognised on the trade date, being the date on which the Company commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

##### Measurement

##### *Financial assets held at fair value through profit or loss*

Changes in fair value and transaction costs are recognised in profit or loss.

##### *Fair value in an active market*

The fair value of listed investments is based on their quoted market prices at the reporting date without any deduction for estimated future selling costs. The quoted market price used for financial assets held by the Company is the current close price.

Net gains/(losses) on financial assets held at fair value through profit or loss arising on a change in fair value are calculated as the difference between the fair value at period end and the fair value at the previous valuation point. Net gains/(losses) do not include interest or dividend income.

The Company's Investment Valuation Policy is discussed in Note 13.

#### h) Equity, reserves and accumulated losses

Share capital represents the value of shares that have been issued. Any transaction costs associated with the issuing of shares are deducted from share capital, net of any related income tax benefits.

Accumulated losses include all current and prior accumulated losses.

#### i) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, together with other short-term highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

#### j) Receivables

Receivables represent the principal amounts due at reporting date plus accrued interest and less, where applicable, any unearned income and provisions for expected credit loss.

### 4. SUMMARY OF ACCOUNTING POLICIES (CONTINUED)

#### k) Provisions

Provisions are recognised when the Company has a legal or constructive obligation, as a result of past events, for which it is probable that an outflow of economic benefits will result, and that outflow can be readily measured.

Provision is made for the Company's liability for employee benefits arising from the services rendered by employees to the end of the reporting period. Employee benefits that are expected to be wholly settled within one year have been measured at the amounts expected to be paid when the liability is settled, plus related on-costs. Employee benefits payable later than one year have been measured at the present value of the estimated future cash outflows to be made for those benefits.

#### l) Goods and services tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Tax Office. In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the statement of financial position are shown inclusive of GST.

Cash flows are presented in the statement of cash flows on a gross basis, except for the GST components of investing and financing activities, which are disclosed as operating cash flows.

#### m) Rounding of amounts

NGE Capital Limited is a type of Company referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 and therefore the amounts contained in this report and in the financial report have been rounded to the nearest \$1,000, or in certain cases, to the nearest dollar.

#### n) Significant management judgement in applying accounting policies

When preparing the financial statements, management undertakes a number of judgements, estimates and assumptions about the recognition and measurement of assets, liabilities, income and expenses.

The following are significant management judgements in applying the accounting policies of the Company that have the most significant effect on the financial statements.

#### Recovery of deferred tax assets

Deferred tax assets are recognised for deductible temporary differences only if the Company considers it is probable that future taxable amounts will be available to utilise those temporary differences and losses. Judgement is required in determining whether it is probable that the tax losses will be utilised against future taxable income and the quantum of the amount which is considered probable. Deferred tax assets are valued using the tax rate applicable to a base rate entity. The actual tax rate applicable to the Company will not be known until the year in which the Company is first assessed to pay income tax. The Company expects to be a base rate entity when the deferred tax assets are realised. Details of deferred tax assets are included in Note 11.

<b>Potential tax benefit of unused and unrealised losses – \$ per share</b>	<b>\$0.23</b>	<b>\$0.31</b>

<sup>1</sup> A deferred tax asset of \$2.920 million (potential tax benefit at 25.0% of \$11,680 million) has been recognised on unused Australian tax losses of the Company. The deferred tax asset was recognised based on the following management judgements:

- i) The Company has produced a cumulative profit before income tax of \$24.401 million since becoming a LIC on 30 November 2016; and
- ii) By applying the average Australian and International share returns since 1970 of 9.60% p.a. over a four-year investment time horizon, the Board considered it is probable that sufficient future taxable profits will be available to offset the amount of the deferred tax asset.

<sup>2</sup> This represents total realised tax losses and capital losses which are unused and have not been recognised as a deferred tax asset.

<sup>3</sup> The taxation benefits will only be obtained if:

- i) The Company derives future assessable income of a nature and of an amount sufficient to enable the benefit from the deduction for the loss to be realised;
- ii) The Company continues to comply with the conditions for deductibility imposed by law and, in particular, as long as NGE continues to satisfy the continuity of ownership test as set out in Divisions 165 and 166 of the *Income Tax Assessment Act 1997* (Cth); and
- iii) No changes in tax legislation adversely affect the Company in realising the benefits from the deductions for the loss.

Not included in the above table:

- The impaired value of certain investments in Australia which may in future give rise to further Australian tax losses.

### 12. FINANCIAL RISK MANAGEMENT

#### a) Risk management objectives and policies

The Company's financial instruments consist mainly of cash and deposits with banks, accounts receivable and payable, and borrowings. The Company's overall risk management program seeks to minimise potential adverse effects on the financial performance of the Company and may use a range of derivative financial instruments to manage risk exposures.

The main risks arising from the Company's financial instruments are foreign currency risk, interest rate risk, credit risk, liquidity risk and price risk. Senior management, in conjunction with the Board, reviews and agrees policies for managing each of these risks.

#### b) Foreign currency risk

The Company is exposed to foreign currency risk on holding assets and liabilities denominated in currencies other than Australian dollars. The currencies giving rise to this are CAD, EUR, GBP and USD. The Company does not currently enter into derivative financial instruments to hedge such transactions denominated in a foreign currency.

At 31 December 2023, the Company had the following exposure to various foreign currencies:

### 12. FINANCIAL RISK MANAGEMENT (CONTINUED)

#### c) Interest rate risk

At 31 December 2023, the Company had no fixed rate debt.

The Company had the following mix of financial assets and liabilities exposed to variable interest rate risk:

	2023	2022
Financial assets	\$'000	\$'000
Cash and cash equivalents	3,215	12,152
<b>Total</b>	<b>3,215</b>	<b>12,152</b>

The Company has performed sensitivity analysis relating to its exposure to interest rate risk at reporting date. This sensitivity analysis demonstrates the effect on the current year results which could result from a change in these risks.

	\$'000	\$'000
Increase/(decrease) in profit/(loss)		
- increase in interest rate by 2%	128	215
- decrease in interest rate by 2%	(110)	(182)

#### d) Credit risk

The maximum exposure to credit risk, excluding the value of any collateral or other security, at reporting date, to recognised financial assets, is the carrying amount, net of any provision for impairment of those assets, as disclosed in the Statement of Financial Position and notes to the financial statements.

The Company does not have any material credit risk exposure to any single debtor or group of debtors under financial instruments entered into by the Company.

#### e) Liquidity risk

Liquidity risk is the risk that the Company might be unable to meet its obligations. The Company manages its liquidity needs by continuously monitoring forecast and actual cash flows and ensuring there are appropriate plans in place to finance these future cash flows.

As at 31 December, the Company holds \$4.053 million in cash and has no fixed rate debt.

As at 31 December, the Company's non-derivative financial liabilities have contractual maturities (including interest payments where applicable) as summarised below:

### 13. FAIR VALUE MEASUREMENT

The Company measures and recognises the following assets at fair value on a recurring basis:

- Financial assets held at fair value through profit or loss

There are no assets or liabilities measured at fair value on a non-recurring basis in the current reporting period.

#### Fair value hierarchy

AASB 13 requires disclosure of fair value measurements by level of the following fair value measurement hierarchy.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). These include quoted prices for similar assets or liabilities in active markets.
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The table below presents the financial assets (by class) measured and recognised at fair value at 31 December.

	Level 1	Level 2	Level 3	Total
	\$'000	\$'000	\$'000	\$'000

<b>Total Financial Assets at fair value through profit or loss</b>	<b>21,379</b>	<b>-</b>	<b>-</b>	<b>21,379</b>

#### Valuation techniques used to determine fair values

Assets in the Company's investment portfolio are valued in accordance with the Company's published Investment Valuation policy, a summary of which is provided below. This summary does not purport to be complete, and readers should refer to the full Investment Valuation Policy which is available on the Company's website.

#### LEVEL 1

The fair value of investments that are traded in an active market (for example, listed equities) is determined using the last traded quoted price in an active market. As at 31 December 2023, the Company had \$28,651,000 (2022: \$21,379,000) financial assets held at fair value through profit or loss included in Level 1. As at 31 December 2023 the Company had \$ Nil (2022: \$ Nil) financial liabilities held at fair value through profit or loss included in Level 1.

#### LEVEL 2

The fair value of investments that are not traded in an active market (for example, unlisted securities) is determined by reference to quoted prices for similar assets or liabilities in active markets. As at 31 December 2023, the Company had \$ Nil (2022: \$ Nil) investments in Level 2.

## NOTES TO THE FINANCIAL STATEMENTS

### 13. FAIR VALUE MEASUREMENT (CONTINUED)

*Fair value hierarchy (continued)*

*Valuation techniques used to determine fair values (continued)*

#### LEVEL 3

If one or more of the significant inputs is not based on observable market data, the investment is included in Level 3. The fair value of unlisted securities for the first 12 months of ownership is usually valued at the cost of the investment, unless there is an apparent change in circumstances which would indicate the need for a new valuation. Such a circumstance may include observing the price from a recent transaction of an investment, provided the relevant transaction occurred sufficiently close to the measurement date (usually within 12 months).

In the absence of a recent transaction providing a reliable estimate, the fair value of unlisted direct securities will be calculated with reference to appropriate valuation methods including, but not limited to, an assessment of the investment's cash flows.

As at 31 December 2023, the Company had \$1,360,000 (2022: \$ Nil) of investments held at fair value through profit or loss included in Level 3.

#### Valuation of Danakali Limited as at 31 December 2023

At 30 June 2023 the Company valued its holding in Danakali Limited (ASX:DNK) (**Danakali**) at \$0.41 per share (a total value of \$8,200,000), being the last traded price before Danakali's shares were suspended from quotation on ASX on 3 April 2023. This measurement of fair value was a Level 1 valuation as the last traded price represented the most reliable evidence of value in an active market. Significant events since 30 June 2023 – including receipt of the Tranche 2 Colluli sale proceeds and the announcement of a definitive proposal to distribute a portion of Colluli sale proceeds to shareholders – resulted in the Board determining that an adjustment to the measurement of fair value of NGE's Danakali shareholding was appropriate. The fair value of the holding was revalued at \$9,760,000 using a Level 3 valuation methodology. The valuation techniques involved in this methodology included:

- Valuation of the dividend and shareholder approved capital return, to be received on or about 8 January 2024, at nominal value (A).
- Valuation of the estimated cash balance as at 31 December 2023 (B) as follows:
  - Estimating cash balance by summing expected inflows and outflows since the last reported cash balance at 30 September 2023;
  - Discounting the estimated cash balance to account for normal business risks;
  - The discount rate was determined by analysing the average share price discount to net tangible assets of companies with similar profiles to Danakali traded on the ASX.
- Calculation of total valuation as A + B.

Following shareholder approval for the capital return portion of the distributions at a general meeting in November 2023, the value of the distributions of \$8,400,000 was transferred from Level 3 to Trade and Other Receivables. Accordingly, the Level 3 fair value of the Danakali holding at 31 December 2023 was \$1,360,000 (31 December 2022: \$ Nil).

Ordinary shares entitle the holder to participate in dividends and the proceeds on winding-up of the Company in proportion to the number of shares held. Every ordinary shareholder present at a meeting of the Company, in person or by proxy, is entitled to one vote, and upon a poll each ordinary share is entitled to one vote. Ordinary shares have no par value.

#### b) On-market share buy-back

On 21 August 2017 the Company announced a 10/12 on-market buy-back to commence on or after 4 September 2017. This buy-back is of unlimited duration and was re-confirmed by the Board for the years commencing on 4 September 2018 through 2023, with the Company reserving the right to suspend or terminate the buy-back at any time. During the year 166,324 (2022: 65,025) shares were bought back and cancelled. The total cost of \$127,075 (2022: \$53,199) was deducted from Share Capital. All shares bought back have been settled and then cancelled by the Registry at balance date.

## Independent Auditor's Report

### To the Members of NGE Capital Limited

#### Report on the audit of the financial report

##### Opinion

We have audited the financial report of NGE Capital Limited (the Company), which comprises the statement of financial position as at 31 December 2023, the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the Directors' declaration.

In our opinion, the accompanying financial report of the Company is in accordance with the *Corporations Act 2001*, including:

- a Giving a true and fair view of the Company's financial position as at 31 December 2023 and of its performance for the year ended on that date; and
- b Complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

##### Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's *APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How our audit addressed the key audit matter
<b>Financial assets held as fair value through profit or loss – listed equity securities, Note 13</b>	
<p>As at 31 December 2023, the Company's financial assets held at fair value through profit or loss totalled \$30.011m.</p> <p>The fair value of the investment portfolio is not considered to be judgemental in nature as it is comprised of equity securities listed on recognised stock exchanges.</p> <p>We consider the existence and valuation of investments a key audit matter due to this being the area with the greatest effect on our overall audit strategy and allocation of time and resources in planning and performing our audit.</p>	<p>Our procedures included, amongst others:</p> <ul style="list-style-type: none"><li>• Assessing the valuation of all listed investments held at year end to market data and publicly quoted prices for accuracy;</li><li>• Where listed investments have not traded for a prolonged period before 31 December 2023, assessed the appropriateness of inputs and adjustments made to the fair value of the investments at balance date;</li><li>• Selecting a sample of purchases and sales of investments, and agreeing details to supporting documentation;</li><li>• Agreeing the number of shares held to external holdings statements as at 31 December 2023;</li><li>• Evaluating purchases and sales occurring near year end to assess whether significant unsettled trades are appropriately accounted for;</li><li>• Obtaining a roll forward of activity by investment and recalculating the realised gain or loss on disposals for accuracy; and</li><li>• Assessing the adequacy of the Company's disclosures.</li></ul>
<b>Deferred tax asset, Note 11 &amp; 19</b>	
<p>As at 31 December 2023, the Company recognised a deferred tax asset ("DTA") of \$2.920m for the carry forward of unused tax losses.</p> <p>The DTA is recognised to the extent that it is probable that future taxable profits will be available against which the unused tax losses can be utilised.</p> <p>We consider the recognition and recoverability of the DTA to be a key audit matter, as the calculation is judgemental and based on assumptions regarding expected future market and economic conditions.</p>	<p>Our procedures included, amongst others:</p> <ul style="list-style-type: none"><li>• Obtaining historical tax returns lodged by the Company and checking the accuracy of the calculation of available losses;</li><li>• Evaluating the Company's ability to utilise, and availability of, historical tax losses in the current and future years, and assessing advice provided by management's expert under the 'continuity of ownership' test against the requirements of tax legislation;</li><li>• Evaluating management's expert and the advice provided;</li><li>• Considering whether the amount recognised as a DTA as at 31 December 2023 is reasonable based on historical investment performance, projections, and other available information; and</li><li>• Assessing the adequacy of the Company's disclosures.</li></ul>

### **Information other than the financial report and auditor's report thereon**

The Directors are responsible for the other information. The other information comprises the information included in the Company's annual report for the year ended 31 December 2023, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### **Responsibilities of the Directors for the financial report**

The Directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001* and for such internal control as the Directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

### **Auditor's responsibilities for the audit of the financial report**

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: [http://www.auasb.gov.au/auditors\\_responsibilities/ar2\\_2020.pdf](http://www.auasb.gov.au/auditors_responsibilities/ar2_2020.pdf). This description forms part of our auditor's report.

### **Report on the remuneration report**

#### **Opinion on the remuneration report**

We have audited the Remuneration Report included in pages 16 to 20 of the Directors' report for the year ended 31 December 2023.

In our opinion, the Remuneration Report of NGE Capital Limited, for the year ended 31 December 2023 complies with section 300A of the *Corporations Act 2001*.

## Responsibilities

The Directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
