# Investment philosophy

## Target investments that can generate strong returns with an adequate margin of safety

- Individual securities can and do significantly deviate away from their fair value.
- Potential to generate strong risk-adjusted returns by investing in select securities at opportune times.

## Aim to hold a high conviction, concentrated portfolio

- Only invest in a compelling opportunity, otherwise hold cash.
- Prefer to invest heavily in a small number of high conviction opportunities, than invest small amounts in a large number of less compelling investments.

## Invest based on fundamental analysis

- Bottom up stock selection, focusing on the fundamentals of individual companies rather than market trends.
- Conduct extensive proprietary research with a focus on:
  - **Board and management** – track record, skin in the game.
  - **Credit risk** – gearing, debt profile, interest coverage.
  - **Earnings** – free cash flows including timing and likelihood, margins, payout ratio, growth potential.
  - **Valuation** – multiples, discounted cash flow analysis, break-up value.
  - **Competition** – market share, industry position, sensible market operating.

# Investment process

## Proprietary research

# Outlook

Funds investing in industrials and profiting from PE expansion at a time of loose global monetary policies will have a tough time with such a strategy from this point on.

We expect that it will become more of a stockpicker's market in the near-term, which will suit us just fine.

Currently seeing more value opportunities in the market.

Continue to build up NGE's portfolio and grow NTA based on sound investment principles.

Continue to build track-record, as has been the case over the past 6 months.

Continue sensible capital management programs, with the continuation of an on-market buy-back at attractive prices.

Improved marketing and promotion to improve liquidity of the Company's shares.

We expect the discount to NTA to narrow over time, better reflecting the Company's intrinsic value in the share price.
